Question	1 pts
When drawing at a scale of $1/8'' = 1'$, each 1/8-inch increment in the drawing represents _____ (two words - not numerals) in the full-sized object. _____ ☐ one foot ☐ 8 feet ☐ 1" ☐ 8"	

Question	1 pts
On the architect's scale the major divisions are indicated as 10, 20, 30, 40, 50, and 60. _____ ☐ True ☐ False	

Question	1 pts
The information gathered during the analysis phase is generally organized and documented in a _____ format. _____ ☐ written	

☐ drawn☐ graphic☐ informal**Question****1 pts**

The programming phase is performed with schematic drawings.

☐ True☐ False**Question****1 pts**

More information and research done at the beginning of a project will help to guide the design team through the design process and close the _____ between synthesis and analysis.

☐ gap☐ mountain☐ edge☐ field**Question****1 pts**

Matrices and adjacency studies are created during the design development phase.

☐ True

☐ False

Question**1 pts**

It is best to draw the adjacency matrix at a 30-degree angle.

☐ True

☐ False

Question**1 pts**

Bubble diagrams are drawn to scale, reflect general relationships, and actual sizes or shapes.

☐ True

☐ False

Question**1 pts**

Blocking diagrams are drawn before bubble diagrams.

☐ True

☐ False

Question**1 pts**

Prototype sketches include what furniture and/or equipment is required for each area so that the square footage of an area can be estimated.

☐ True

☐ False

Question

1 pts

Designers and students use these space studies to move to the next step of the design process to develop “test fits,” which move from simplified concepts to true _____, and the eventual achievement of architectural and interior form.

scale

perspective

isometric drawings

axiometric drawings

Question

1 pts

_____ use graphic images to represent abstraction in a more direct visual manner in order to provide the main organization concepts of the theme.

Parti diagrams
