☐ is antimicrobial

☒ all of the above

Correct!

Additional Comments:

Question 26

0 / 1 pts

Linoleum

Correct Answer

☐ may be repaired☐ is anti-static☐ resists moisture

You Answered

☒ all of the above

Additional Comments:

Question 27

0 / 1 pts

Oxidize means the gradual deterioration of metal by chemical reaction when exposed to weather, moisture and corrosive agents

You Answered

☒ True

Correct Answer

☐ False

Additional Comments:

Question 28

1 / 1 pts

An example of oxidization is when copper acquires a greenish patina.

Correct!

☒ True

☐ False

Additional Comments:

Question 29

1 / 1 pts

Plastics

☐ Some give off formaldehyde

☐ Some give off phenol

☐ Some give off other VOCs

Correct!

☒ all of the above

Additional Comments:

Question 30

1 / 1 pts

An example of oxidization is when copper acquires a greenish patina.

Correct!☒ True☐ False

Additional Comments:

Question 31

1 / 1 pts

Examples of thermoplastics include

☐ acrylic☐ nylon☐ polystyrene**Correct!**☒ All of the above

Additional Comments:

Question 32

1 / 1 pts

Examples of thermoset plastics include

- ☒ Fiberglass Resin
- ☐ Polyvinyl Chloride (PVC)
- ☐ Acrylonitrile butadiene styrene (ABS)
- ☐ None of the above

Additional Comments:

Correct!

Question 33

1 / 1 pts

Plastic Laminate was invented in 1912 as electrical insulation.

- ☒ True

Correct!

☐ False

Additional Comments:

Question 34

1 / 1 pts

High pressure decorative laminate (HPDL) consists of thin layers of resin-impregnated kraft paper & coated with veneer of melamine.

Correct!

☒ True

☐ False

Additional Comments:

Question 35

1 / 1 pts

Plastic laminate contains post-consumer and pre-consumer recycled content.

Correct!

☒ True

☐ False

Additional Comments:

Question 36

1 / 1 pts

Plastic laminate with fine textures and low sheen minimize fingerprints & scratches.

Correct!

☒ True

☐ False

Additional Comments:

Question 37

1 / 1 pts

Corian is considered a solid surface material.

Correct!

☒ True

☐ False

Additional Comments:

Question 38

1 / 1 pts

Corian was developed in 1960s to replace human bones.

Correct!

☒ True

☐ False

Additional Comments:

Question 39

1 / 1 pts

Solid surface materials may include any of the following: quartz minerals, polyester resins, acrylic polymer, alumina trihydrate, cultured marble, granite, slate, marble or concrete

Correct!

☒ True

☐ False

Additional Comments:

Question 40

1 / 1 pts

Alabaster, marble and limestone are all found in Oklahoma.

Correct!

☒ True

☐ False

Additional Comments:

Question 41

1 / 1 pts

Soapstone is chemical resistant and may be used in laboratories.

Correct!

☒ True

☐ False

Additional Comments:

Question 42

1 / 1 pts

Marble resists wine stains and would be a good choice for a bar countertop.

☐ True

☒ False

Correct!

Additional Comments:

Correct!

☒ True

☐ False

Additional Comments:

Question 47

1 / 1 pts

Tempered Glass

☐

is float glass that has been subjected to special heating & cooling processes during manufacturing

☐

is very strong

☒

all of the above

Correct!

☐ none of the above

Additional Comments:

Question 48

1 / 1 pts

Radius edges

- ☐ are user-friendly
- ☐ wear better than sharp edges
- ☒ all of the above
- ☐ none of the above

Correct!

Additional Comments:

Question 49

1 / 1 pts

Quartz countertops

- ☐ are non-porous

Correct!

- ☐ are highly sanitary
- ☐ resist staining
- ☒ all of the above

Additional Comments:

Question 50

1 / 1 pts

Glass

- ☐ does not absorb odors
- ☐ does not emit odors
- ☒ all of the above
- ☐ none of the above

Correct!

Additional Comments:

Fudge Points: 1

You can manually adjust the score by adding positive or negative points to this box.
