☒ Show Question Details

Question	0.5 pts
In drawing interior spaces in a building section, full assemblies such as the concrete floor thickness, granular fill, and below-ground footings _____.	
☐ do not really need to be illustrated	
☐ need to be shown	
☐ are shown with dashed lines	
☐ are shown with dotted lines	

Question	0.5 pts
A building section cut line shown on the floor plan through the length of a building is called a _____ section.	
☐ longitudinal	
☐ transverse	
☐ latitudinal	
☐ inverted	

Question**0.5 pts**

Building section lines keyed on a floor plan _____ entirely straight line through a building or interior.

☐ are not always

☐ are

☐ are never

☐ cannot be

Question**0.5 pts**

In drawing a section through an object, the lines or outlines around these sliced materials are drawn with _____ lines to accent the cut.

☐ heavy thick

☐ medium

☐ dashed

☐ hatched

Question**0.5 pts**

A building section cut through the narrow width of a building is a _____ section.

- ☐ transverse
- ☐ longitudinal
- ☐ latitudinal
- ☐ equatorial

Question

0.5 pts

The arrows shown on building section symbols (in the floor plan) show the direction of the view. The top number is the section number, and the bottom one indicates

_____.

- ☐ the sheet it is drawn on
- ☐ how many sections are cut
- ☐ the last section on this sheet
- ☐ the reference to the elevations

Question

0.5 pts

In construction drawings, movable furniture is _____ in the building section.

- ☐ generally not shown
- ☐ always shown shown in isometric view
- ☐ shown with dashed lines

- ☐ called out to be detailed elsewhere

Question**0.5 pts**

A section that is drawn at a large scale to show the specifics of an interior or exterior building wall is called a _____ section.

- ☐ wall
- ☐ building
- ☐ detail
- ☐ longitudinal

Question**0.5 pts**

In drawing sections, designers should use at least _____ graphical line weight(s) to visually make the section clearly understandable as to materials shown in section, voids, and objects seen beyond the section.

- ☐ three
- ☐ one
- ☐ two
- ☐ four

Question**0.5 pts**

1. In drawing sections, if an item is not to be supplied by contractor, the notation NIC is added, which stands for _____ .

- ☐ not in contract
- ☐ never in construction
- ☐ noted in contractor's list
- ☐ noted in construction
